- Denotes the response rate does not instill confidence for the given range around the mean score (response rate below 80%)
- Denotes the response rate instills low confidence for the given range around the mean score (response rate 80%-90%)
- Denotes the response rate instills some confidence for the given range around the mean score (response rate 90%-95%)
- Denotes the response rate instills high confidence for the given range around the mean score (response rate over 95%)

*Table created using 108 courses with a perfect or near perfect response rate from Spring 2007 to Spring 2010

For Example:
 In a class of 17 students, of whom 7 responded, where the mean rating on a question was 4.1, there is an 92 % chance that the actual mean is between 3.7 and 4.5 (+/- 0.4).
 If 7 students in the course had responded to that question with a mean rating of 4.1, there is a **44%** chance that the actual mean is between 4.0 and 4.2 (+/- 0.1).
